REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest the claimed interferometric coupler comprising: at least one input for conveying radiation incident to the coupler; a first amplifying part optically coupled to the at least one input for amplifying the incident radiation; a second transparent part optically coupled to the first part to guide radiation previously amplified in the first part; and at least two outputs optically coupled to the second part for conveying radiation from the coupler.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Davies, Thylen, and Lestra et al disclose different types of couplers including an amplifying part and a transparent part. However, these references fail to disclose at least two outputs optically coupled to the second transparent part for conveying radiation from the coupler. Nor there is suggestion to provide two outputs coupled to the transparent part of the coupler.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hemang Sanghavi whose telephone number is (571) 272-2358. The examiner can normally be reached on Monday-Thursday (8:30 AM-6:00 PM).
